DuoSTATION MDM

Mobile device management in the cloud

DuoSTATION® MDM is a 100% cloud based Mobile Device Management system that is designed to be easy to use.

Easy to get started

DuoSTATION MDM is a 100% cloud based solution that is sold as a service. We set up and manage necessary IT infrastructure. The only thing you need is a web browser and an account. No other preparations are needed. Users enroll by using a link that can be sent by e-mail or SMS from within the system. The link can also be published on an intranet or a service desk site. Smart functionality matches all devices to the correct user automatically.

Inventory

Gather information about hardware, apps and how the devices are configured. Create reports, save as PDF or export to Excel.

Positioning

Keep track of all your devices. The location of the devices is reported automatically and can be shown in the built-in map view.

Configuration

Configure and deploy settings for VPN, Wifi, APN, certificates and e-mail (Exchange/Lotus Notes) etc. from one central point. Our system makes sure that all users will get the right configuration and apps for their mobile devices.

Deployment

Deploy apps to all your devices with just a few mouse clicks or by group policies. It's possible to install your own developed apps and apps located at Apple VPP/App Store/Google Play. Find and link apps in App Store/Google Play with our integrated search function. Create shortcuts to websites, service desk, instruction videos and more.

Security

Set up policies for passwords and secure handling of your devices. Lock or wipe devices automatically when the wrong password is entered. It is also very easy to lock, wipe and reset passwords for one or many devices.

Restrictions

Use our system to control how the mobile devices should be used in your organization. For instance it's possible to prevent apps to be installed, YouTube to be used and usage of data roaming.

Reports

Use one of many reports to easily study different kinds of device models, operators, most installed apps etc. If you have a special request about a report, contact us and we will help you at no extra cost.

Integration

Authenticate users in AD/eDirectory. Import users from your AD/eDirectory. Export information for all devices automatically into DuoSTATION. Save data lists to Excel or create printouts as PDF.
Fully integrated with Apple VPP and Apple DEP (unlimited number of accounts).

Economy

By using integration with DuoSTATION, you will get access to a lot of smart features which make it easy to plan your budget, create report for internal/external debits and so on.

System

The system supports devices running iOS, Android, macOS and tvOS. You can run DuoSTATION MDM in-house if preferred.
